

STANDARD PROP LOCK™

(Patented & Registered Design)

The world's most advanced, reliable and secure prop lockout device. Lock out your adjustable props with the Flexiprop Standard Prop Lock™, making them safe and secure no matter what industry you are in.

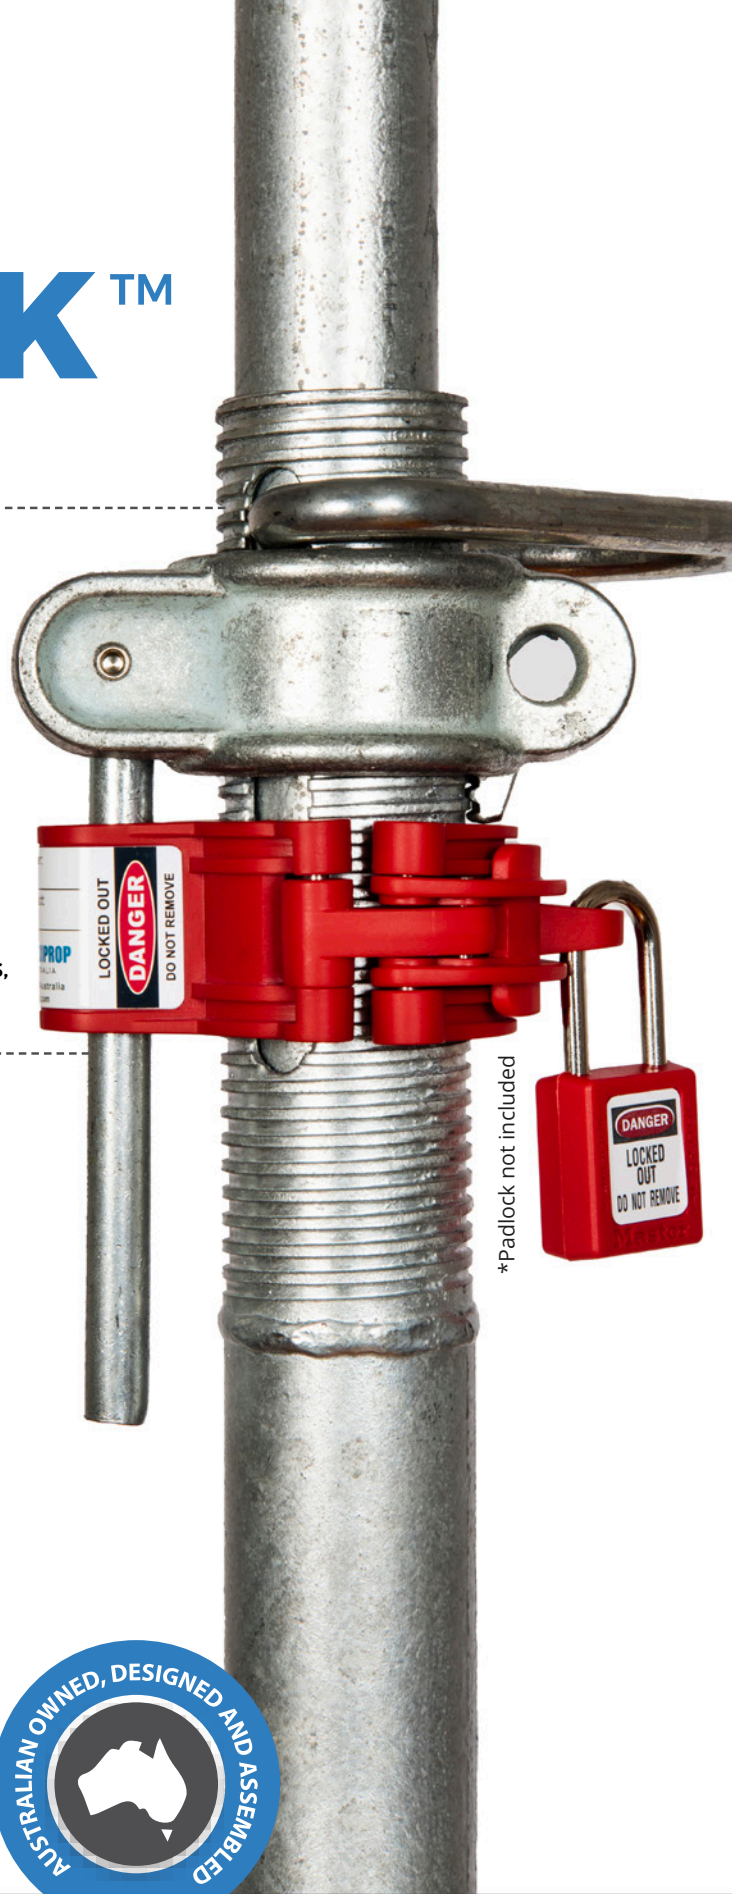

With a unique expansion joint, the Flexiprop Australia Standard Prop Lock™ will fit over and 'lock out' the most common adjustable construction props.

Researched and developed in Australia with extensive consultation with industry experts and safety specialists, this is the only secure lockout device available.

- ▲ Fits over and "locks out" the most common brands of adjustable construction props
- ▲ Unique expansion joint (providing wider fitting options)
- ▲ Affordable, durable, reusable
- ▲ Made from impact resistant nylon and stainless steel
- ▲ Quick and easy to fit or remove in less than 10 seconds
- ▲ Able to be locked out by single or multiple personnel
- ▲ Fast removal in case of an emergency
- ▲ Can be placed on props that are already erected without them being dismantled
- ▲ Crafted to Australian standards

*Padlock not included
